

Ordian Capital BCI Balanced Fund of Funds A

Minimum Disclosure Document | 30 November 2025

Investment Objectives

The Fund's investment objective is to deliver a moderate to high long term total return with limited risk of capital loss.

Investment Policy

The Fund's portfolio will invest in a combination of equities, fixed income, property and cash, in both domestic and international markets. This may also include participatory interest in other forms of local and global collective investment schemes or other similar schemes operated in territories with a regulatory environment which is to the satisfaction of the manager which invest in, amongst others, equity securities, property securities, non-equity securities and instruments, money market instruments, preference shares, listed and unlisted financial instruments, bonds and other interestbearing instruments and securities. To the extent that the assets in the portfolio are exposed to exchange rate risk, the manager may enter into financial transactions for the exclusive purpose of hedging such exchange rate risk subject to the conditions and limits as stipulated by the Act.

Fund Profile

The Fund is a multi-asset investment scheme, with a broad mandate to invest across asset classes. The portfolio maintains a moderate risk profile and the portfolio's equity exposure will be limited to a maximum of 75% of the portfolio's net asset value. The Fund may allocate up to 45% to international market exposure and will comply with the Regulation 28 limits governing retirement funds.

Investor Profile

The Fund is suitable for investors seeking capital growth, with limited risk of capital loss over the medium- to long-term. It is suitable for investors with an investment horizon of at least 5 years. It could be utilised as a stand-alone diversified fund for retirement savings or as part of a portfolio of multi-asset funds.

Risk Profile

Moderate - High Risk

- This portfolio holds more equity exposure than a medium risk portfolio but less than a high-risk portfolio. In turn the expected volatility is higher than a medium risk portfolio, but less than a high-risk portfolio. The probability of losses is higher than that of a medium risk portfolio, but less than a high-risk portfolio and the expected potential long term investment returns could therefore be higher than a medium risk portfolio.
- Where the asset allocation contained in this MDD reflects offshore exposure, the portfolio is exposed to currency risks.
- The portfolio is exposed to equity as well as default and interest rate risks.
- Therefore, it is suitable for medium to long term investment horizons.

Annualised return is the weighted average compound growth rate over the period measured.

Risks and Disclosures

Certain investments - including those involving futures, options, equity swaps, and other derivatives may give rise to substantial risk and might not be suitable for all investors. Where foreign securities are included in the portfolio there may be additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information.

*Monthly fixed admin fee: R15 excl. VAT which apply to all direct investor accounts with balances of less than R100 000 at month end, unless an investor transacts online, in which no such fee will be levied.

FAIS Conflict of Interest Disclosure

Please note that your financial advisor may be a related party to the co-naming partner and/or BCI. It is your financial advisor's responsibility to disclose all fees he/she receives from any related party. The portfolio's TER includes all fees paid by portfolio to BCI, the trustees, the auditors, banks, the co-naming partner, underlying portfolios, and any other investment consultants/managers as well as distribution fees and LISP rebates, if applicable. The portfolio's performance numbers are calculated net of the TER expenses. The investment manager earns a portion of the service charge and performance fees where applicable. In some instances portfolios invest in other portfolios which form part of the BCI Scheme. These investments will be detailed in this document, as applicable.

Total Expense Ratio (TER)

Please note: A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. Transaction Costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The prior year ("PY") TER and Transaction cost calculations are based upon the portfolio's direct costs for the financial year ended 31 December 2024, whilst the underlying portfolios' ratio and cost calculations are based upon their most recent published figures, being 30 September 2025.
